

INTERNATIONAL NEWS AND CHRISTIAN PRAYER UPDATE (INCPU)

International News and Christian Prayer Update ~ 06-16-2010

Subject: 'Oil in the Gulf, with Rockefeller and Martial Law'

'Proof that the Oil 'spill' is intentional and they have plans for it'

Our dear fellow Americans,

Those oil leaks in the Gulf of Mexico are pumping much higher quantities than reported, apparently more like 100,000 barrels a day. These leaks are a serious danger for several reasons. In this news report, we work to expose a money trail showing these events were planned many months before the explosion, with the intent of long-term problems, with several possibilities to make it worse, and the people behind this hope to upsize it into a martial-law disaster. But, while Americans are stunned by the oil damage, we are all distracted from D.C., where 90% of the bills in Congress are said to be being passed without being voted on. This is the Elites version of a full-court press against America. At the same time, our military contractors are desperate for a war, look at them, they are trying to use any excuse to start something. Have you ever wondered why our military is hammering so hard on Afghanistan? Their goal is to corner the good deals on \$1,000,000,000,000 worth of raw materials. For more on this, see the details later on in this report.

We need to challenge more of our pastors to be addressing these real issues going on and having genuine prayer times, repenting and forsaking the idols we selfishly love, and praying that God would expose these criminals, help the people to stop them, and bring them to justice.

There are 1,518 oil rigs in the Gulf of Mexico. All of those companies have experts who could stop this 'crisis'. Is BP listening to any of them? Doesn't look like it. Also, there is a Texas man who owns and operates an oil pipeline company and has 3 decades of experience with pipelines and hydraulics who has been offering a tried-and-tested solution that would stop the leak in 2 weeks. But, so far, BP has been ignoring him. But, besides those details, in Grand Isle, Louisiana, there are 17,500 troops. At the time that was first reported, there was no sign of oil spill there. The bigger is why are these troops there are why are they fully armored, including with body armor? There are reasons to watch this story - it could be the start of a mass forced-evacuation. Please research the articles included in this update.

This report highlights a variety of attempts the big-money types are trying to do. We should all be asking God to protect and revive our country. We need God's help to stop them.

Please share this information with your friends! Your friends need to know this information too!

your brethren in Christ,
friends of the honorable Jewish people in Israel and abroad, and
servants and followers of Jesus Christ

World News

G-20 Coordination Fails as Global policy makers start to clash

<http://www.blacklistednews.com/news-9115-0-13-13--.html>

Editor's comments: There are other article links, and links to our previous updates at the end of this news update. ~

Editor's comments: So, what else is going on in the Gulf (of Mexico)? 1,000,000 gallons of Corexit - a class D toxin (in Canada), the highest classification of toxin in the US (EPA), and banned from use in Britain. Why? Because of its ingredients: "arsenic, cadmium, mercury, cyanide..." Additionally, it's rated as extremely toxic on contact because of its effects on humans -it's mutagenic (destroying DNA). It is toxic, at 2.4 ppm (parts per million), to the liver and central nervous system, and is known for causing cancer and birth defects. BP (and those in the shadows) have spread 1,000,000 gallons of this toxin in the Gulf of Mexico so far. There are more details and links on this at the end of this report, and also links to previous INCPU reports. ~

Editor's Notes: Folks, that chemical they spread is a massive murder weapon that will continue doing damage for years, and now we also know that it was planned - this story has many criminal activities that are knitted together. The commands to let the oil keep spilling go all the way to the top of BP and the US government. There are many serious questions being asked by citizens, who want to know what those high altitude planes are spraying on us? Is Corexit something they are spraying on us as well... time will show that. If you have any video on Chemtrails, Alex Jones is working on a documentary and would like everyone to send in their videos so he can put together a comprehensive documentary. You can contact him at his contact on his website and attach the videos to the message. Here's the link:
<http://helpdesk.infowars.com/cgi-bin/ttx.cgi>

Other interesting notes are starting to come out about who all is involved in this created 'crisis' ~

[US has approved 19 environmental drilling waivers since oil spill](#)

<http://www.infowars.com/us-has-approved-19-environmental-drilling-waivers-since-oil-spill>

Editor's comments: Why did they sign new oil well permits? Because they were blackmailed by competitive oil companies that knew they were not trying to cap the oil and were trying to make it bigger. ~

Editor's comments: The first outstanding problem is how they are pretending that they don't have a way to stop the leak. The government doesn't sign permits until there are emergency plans to deal with potential problems. After this many years and 1,518 oil wells there in the Gulf, there are obviously many quick solutions. Oil companies, the US military, and the US military contractors have several ways of stopping this 'leak', and so does the Pentagon (the Pentagon designed at least some of the deep-water drilling rigs like the ones in the Gulf). And all of these groups have many ways to clean up this mess, but they are refusing to do them, and are letting BP (and those in the shadows) intentionally make this oil flow and created crisis worse. Another interesting note: You might ask how could the government sign for new oil wells if the future of oil is up in the air? It is not a problem and they are not worried about the spill. But they are worried that about the price of oil coming down if we keep drilling more wells on this side of the globe. The oil tycoons are complaining about the lower oil prices. For humor, just listen to the queen complaining, it's almost funny. (Both videos above this paragraph reference her comments briefly). So how could any oil company get any permits signed? Simple common bribery. They all

know this leak is a false story and if they named the solutions publicly it would result in criminal charges for the guilty. Signed permits are hush money. ~

[RT Alex Jones oil spill Conspiracy In The Gulf](#)

(YouTube video of interview a few days after the explosions)

<http://www.youtube.com/watch?v=EZKGNTN63uw&NR=1>

Editor's notes: In the clip above, you will hear about a movie called the 'Knowing' - it came out March 2009. I have never seen it nor do I plan to, and I do not recommend anyone go see it because it's contradictory to the Bible. But, what I've read and heard is that the movie is full of occult symbols, philosophy, and demonic UFO lies. The only reason that film is interesting at all is because the Elites told us more than 13 months ahead of time that they were going to cause this oil 'crisis'. In the film, it's said, that there is a news report that shows an explosion and fire on an oil rig in the gulf on April 20, 2010. This movie came out March 2009 telling to-the-day about

this oil rig 'crisis'. In addition to that, they scheduled this oil 'crisis' on 40th anniversary of 'Earth Day'.

When you click on this link: [All 11 missing oil rig workers found alive](#) (and others like it), you will automatically be re-routed to this link: [Coast Guard Ends Search & Rescue Efforts for Missing Oil Rig Crew Members](#). I have searched at least 10 search engines and almost none of them even report that the workers were ever said to be found alive, which I find strange. Then, I found the article below. That was the whole clip. And, I doubt the person who reported it would have made a 'mistake' or been 'mis-reported'. So, the next question is: Where these 11 are now, I haven't found any info on that.

11 missing oil rig workers found after explosion

By [Drew Sagon](#)

April 21, 2010 - 1:58 pm

“...

11 missing oil rig workers were found alive after an oil rig exploded and caught fire off the coast of Louisiana, according to [MSNBC](#). [Plaquemines Parish](#) President Billy Nungesser told local NBC affiliate WDSU that the workers are alive and safe after the explosion that left the rig on fire in the Gulf of Mexico.

15 other workers were injured, seven critically according to coast guard spokeswoman Katherine McNamara. The rig was still burning Wednesday, according to Coast Guard Senior Chief Petty Officer Mike O'Berry.

Coast Guard Lt. Sue Kerver said the coast guard will work with the [Federal Mineral Management Service](#) to investigate possible causes of the accident...”

<http://www.thenewshouse.com/blog/11-missing-oil-rig-workers-found-after-explosion>

Similar article on Reuters:

<http://af.reuters.com/article/energyOilNews/idAFN2119641320100421>

But, I think it's also important to report on the cover-up of this news piece by top 10 search engines (including Google and Yahoo). After searching through more than 10 of them, I got almost nothing on the issue.

But, with the article above in mind and the other clues I found this is the picture I see.

After 1 day of searching for the workers, reports come out that the 11 workers are live. A day later, the story had changed saying that the information had been previously 'mis-reported'. And on the same day that the Coast Guard denies that the workers are found, they also call off their search for these workers. Something is odd here. After only 2 days of searching, reports come out that all 11 workers are alive, then the Coast Guard denies it, but stops its search... Something else seems to be going on here. As you will see in the news clip above, those workers are (or were) very alive somewhere. If they are still alive, is someone holding them against their will? Or has the news been hushed for some reason? They probably have some first-hand knowledge of the events that caused the explosions. We do know that if they are still alive, they have quite a story to tell! If they are still alive, we're praying for their protection, so one day they can talk. ~

Editor's comments: When you put this information with the facts that even the Pentagon can stop this leak and efficiently handle the oil 'spill, this adds up to be something bigger...

Editor's notes: Folks, the most amazing part of this is that this isn't BP all by itself causing this bit of chaos. Who else is involved, you ask? BP's co-partner is: Standard Oil. The Rockefellers - no surprise there. It's true - check this out. ~

BP - Standard Oil History

“1985: Standard Oil (Indiana) changes its name to Amoco Corporation.

1987: BP acquires SOHIO, forms BP America; the British government sells its shares of BP.

1988: Amoco buys Dome Petroleum, Ltd., of Canada.

1994: Amoco restructures, replacing its three major subsidiaries with a network of 17 business groups.

1996: BP merges its European refining and marketing operations with Mobil Corporation.

1997: Amoco begins a divestiture program designed to shed noncore properties.

1998: British Petroleum acquires Amoco Corporation, forming BP Amoco PLC.

2000: BP Amoco acquires Atlantic Richfield Co. and Burmah Castrol, changes its name to BP p.l.c.

Company History:

Formed by the 1998 merger of British Petroleum Company and Amoco Corporation, BP p.l.c. is the third largest oil company in the world...”

http://incpu.tripod.com/articles/BP_-_Standard_Oil_history.htm “

[Food and Depopulation: Rockefeller Family](#)

<http://www.infowars.com/food-and-depopulation-rockefeller-family/>

**

Editor's notes: Okay, so now that we know that Rockefeller's team is involved in this too, we need to ask why. So, why are they doing this? Why is BP-Standard Oil doing this? Why is the US government allowing it? There are many reasons not explored yet, because not all of the schemes have come to light, yet. Here is what we have been able to put together:

1) The Rockefeller family has for years been a part of implementing and pushing and manipulating us into a one-world system: one-world currency, religion, government. The Rockefellers have been a notable member of the Bilderberg group for many years,

and they were charter members of the CFR (Council on Foreign Relations) - an elite social club that manipulates for their profit and control.

2) This 'crisis' is well-orchestrated to be an excuse for martial law - where we plead with those who created this crisis to help us out of it, including using US military on US soil (which violates Posse Comitatus).

a. The oil and chemicals together kill the workers and (the global elites hope) as the oil comes around Florida that it will kill animals, plants, at least some of us and create an excuse to bring in the troops to enact martial law.

b. Hurricane Katrina was called the 'perfect storm' for a reason. It was tweaked to become the nightmare they wanted it to be. And the same people have been warning (read: threatening) to bring a hurricane to (they hope) throw oil everywhere, which is also an excuse to bring in the troops for martial law.

3) At the Bilderberg meetings days ago, (based on leaks) the world's greediest people decided that they want to go to war with Iran (or anyone else if they can fool us), and then that situation is great for re-adjusting economics and industry here in America. (World War II was a great example of that.)

4) Also, we have recently found out that there is so much oil around the world that the Elites know that when that word gets out, the people will not tolerate high gas prices. So, they have been exposed as sending out disinformation for years that the 'world is running out of oil'. That was a lie to keep us in the Elitist/Rockefeller/Arab oil. 'We the People' need to find and pursue alternative energy solutions, and not rely on our friendly, oil-money corrupted government to help us get free. All we can expect from them is rhetoric (which is really lies).

5) They also want to fabricate reasons to limit the oil supply they give us, so they can control us and continue to fleece us.

6) They are passing all kinds of bills through Congress without votes, right now. I don't know how to find out what, but we will need to examine and probably undo those bills.

7) We have many questions about what else they are doing. Like is this a smaller 'crisis' to cover a bigger scandals?... We expect to, by God's grace, continue to report these other details as we find them. ~

Solutions

Fixing the leaks:

Fixing the leak in the gulf is simple and relatively in-expensive, if they wanted to solve it. Among other ideas, it would be quite simple to attach a collar to the pipe leaving it open, and attaching hoses that other companies have used in times before. There are 1,518 wells out there in the Gulf of Mexico, and many experts and experienced technicians who have countless other real solutions for that as well. ~

Oil Spill Fix - We have a solution to the oil spill based on reliable proven technology

“Daniel E. Davis, a pipeline and hydraulics expert with three decades of experience in the oil industry has a solution for the “environmental catastrophe” fouling the Gulf of Mexico...”

<http://www.oilspillfix.com/>

'I Can Fix the Oil Leak!'--Texas Entrepreneur to BP

http://beforeitsnews.com/story/75/704/I_Can_Fix_the_Oil_Leak_--Texas_Entrepreneur.html

BP Chose Riskier, Cheaper Casing for Well

“...The newspaper said the company decided to use the casing several days before the explosion. It was installed by the contractor Halliburton...”

<http://cryptogon.com/?p=15945>

Cleaning up the oil flow:

This is also simple and relatively inexpensive, and there are many great ideas. Some have pointed out how much hay (cow feed) will quickly soak up the oil and can be disposed of fairly easily, once we stop the flow of oil.

Oh, and btw, when Obama lied that he was 'relying' on BP's team to fix the oil 'crisis', he forgot to mention that the US government has military contractors involved in designing and building all kinds of things, including submersible oil rigs. And the US military contractors also have the equipment to solve this - they must have been told to step aside. ~

Noble Corporation's Historical Highlights (historical timeline...)

“... 2002

· Purchased two Pentagon designed semisubmersible drilling rigs, the Transocean 96 and Transocean 97...”

<http://www.noblecorp.com/About/NobleHistory.asp>

Editor's notes: Did you notice that the Pentagon has the technology to design submersible oil rigs, like those in the gulf? Whoever designs those oil rigs can also design a way to stop the oil flow, but we have not heard anything about that. ~

Editor's notes: BP has released 1 million gallons of 'dispersant' into the Gulf of Mexico. First off, containing is opposite of dispersing. Why is BP dispersing the oil instead of using chemicals and methods that would contain and absorb the oil? Secondly, what is in this chemical? Corexit is known as a neurotoxin that the US EPA (Environmental Protection Agency) gives its highest warning label. In 1998, the UK banned it from being used there again. Canada gives this chemical a class D status - immediately toxic. What is in this stuff? It's pretty concerning...

The Amount Of Neurotoxin Pesticide Corexit Sprayed By BP Tops 1 Million Gallons

“BP’s [latest oil spill response update for June 4th says](#) the total amount of the dispersant used in the Gulf of Mexico more than 1,021,000 gallons.

But what most people don’t know is that the active ingredient of the toxic chemical dispersant, which is up to 60% by volume, being sprayed by BP to fight the Gulf oil spill is a [neurotoxin pesticide](#) that is acutely toxic to both human and aquatic life, causes cancer, causes damage to internal organs such as the liver and kidneys simply by absorbing it through the skin and may cause reproductive side effects.

In fact the neurotoxin pesticide that is lethal to 50% of life in concentrations as little as 2.6 parts per million has been [banned for use in the UK](#) since 1998... more specifically [can] delete the entire food chain.

Corexit has also earned the highest EPA warning label for toxicity...

In fact the [study referenced](#) showed that crude oil was lethal at 4250 parts per million to killifish but combination of oil mixed with Corexit was lethal in as little as 317.7 ppm. “Dispersed oils were more toxic than crude oils,” noted the report...

The fact Corexit is 4 times as toxic as oil and up to 11 times as toxic when combined with oil it literally makes no sense to allow the use of such a toxic chemical that can “delete” the ecological systems along the Gulf coast...

What are the chemical components of the dispersants COREXIT 9500 and COREXIT 9527?

While the main ingredient which makes up to 60% of Corexit is reason enough to cause concern.

If you dig any more dirt on these let me know.

The components of COREXIT 9500 and 9527 are:

CAS Registry Number	Chemical Name
57-55-6	1,2-Propanediol
111-76-2	2-butoxy-Ethanol
577-11-7	Butanedioic acid, 2-sulfo-, 1,4-bis(2-ethylhexyl) ester, sodium salt (1:1)
1338-43-8	Sorbitan, mono-(9Z)-9-octadecenoate
9005-65-6	Sorbitan, mono-(9Z)-9-octadecenoate, poly(oxy-1,2-ethanediyl) derivs.
9005-70-3	Sorbitan, tri-(9Z)-9-octadecenoate, poly(oxy-1,2-ethanediyl) derivs
29911-28-2	2-Propanol, 1-(2-butoxy-1-methylethoxy)-
64742-47-8	Distillates (petroleum), hydrotreated light

These have also been found to contain Arsenic, Cadmium, Chromium, Mercury, and Cyanide among other heavy metals.

What are the Chronic Health effects of Corexit?

Here are some of the highlights from the [MSDS for the active ingredient \(2-butoxyethanol\) - of Corexit \(up to 60% by volume\)](#)

- Severe over-exposure can result in death.
- **MUTAGENIC EFFECTS:** Mutagenic for bacteria and/or yeast.
- The substance may be toxic to blood, kidneys, liver, central nervous system (CNS)...
- May cause adverse reproductive effects (maternal and paternal fertility, fetotoxicity)
- May cause birth defects (teratogenic)
- May cause cancer (tumorigenic)...

Classified in Canada as CLASS D-1A: Material causing immediate and serious toxic effects (VERY TOXIC). Classified in Canada as CLASS D-2B: Material causing other toxic effects (TOXIC) ...”

- A free web-tip -

To make surfing the web easier (including this site), it is most often helpful to remember to right-click on the article you want to see, and choose to ‘open in a new window’ or ‘open in a new tab’. That way your original page stays open for easy finding and viewing.

>> *And some may already know this:*

all **blue, bold & underlined words** in this update are links to websites.

You can find this latest update online, here:
