

Operation: Informed Military Officers

Laws for the mind police

<http://unenumerated.blogspot.com/2006/01/laws-for-mind-police.html>

Anti-censorship software

They are providing anti-censorship software to help military and such, they are paying \$10 to anyone who will install their software and keep it installed for at least a week. It is, in effect, a protest effort. Not sure if this is helpful for getting information out; I'm sure they would shut anything down on this site pretty quick that is negative. But you may get a chance to come in covert, if you're willing to get into trouble...

Editor's notes: Military officers believe that they have inside information from their leaders, which is true. However, the information they receive is pre-filtered and deceptive to keep them in a certain mindset for their task. So, there is a crisis coming, which is that our military are educated wrongly to think that all groups that oppose the criminal practices of government are terrorists or are uneducated, unthinking anarchists, or are uneducated lazy people, and they will think the military officers are legitimately supposed to rescue the majority of citizens in America from crazy, backwards-thinking anarchists and terrorists. So we need to educate them, so that they can understand the criminal actions of the government, so they will join 'We the people' in resisting the un-Constitutional, criminal, and corporate take-over of America.

Now here is the important part – these military officers genuinely believe that the information being given to them about their military operations is accurate and that the information is from a logical, moral, helpful point of view. They are educated with false information to minimize their concerns about the well-being of the general population and especially their family, which they are protecting foremost. They don't realize that they are being taken advantage of by the Elitists' military objectives for the new world order take-over that will destroy our freedoms and what is left of our God-fearing moral law and foundation of government. And they won't naturally receive information from anyone outside the military, including their own family, because they are taught to think that we don't know what is going on. They tell a civilian or family member one or a few pieces of information that we didn't know before and to them that is proof enough that we don't know as much as they do and that we couldn't explain a logical point of view that would be more accurate and morally right than their own.

Solution: The only way to reach military with accurate information in time to stop the coming crisis is to educate military families to such a degree that they can help their loved ones to understand clearly, be able to back it up with mounds of accurate, reliable information, and explain the proper world-view to their military family members. We need people to educate those families with military members that can be reasonable and relearn; and we need to educate them on the consequences of the current strategy of world-government, religion, and economy. ~
